

OUTDOOR SAUNA

The wood material for an outdoor sauna is delivered in one rigid, weather-sealed package. The heater and other supplies are delivered in separate packages. The delivery includes everything from the foundation up.

- Spruce wall logs (135 x 45 mm).
- Impregnated floor beams.
- Impregnated sauna room and terrace floor boards. Board spacing ca. 8 mm.
Dressing room's floor in model Keitele is made of tongue-and-groove boards.
- Panel board ceiling.
- Single glazed doors and windows with fittings (handles, lock).
- Spruce board benches.
- Tongue-and-groove roof boards.
- Felt shingle roof.
- Delivery includes also a thermometer, a copper-metal ladle and a bucket.
